READ / EXPLORE / EDIT

A document, connected

Bookmarks, links and page previews keep your place.

Open the outline or page previews in the sidebar.

Follow a link below, then return with location history.

1 Reading and search

Find text, move between matches, and copy a selection.

2 Vector detail

Zoom into crisp paths, pan, and rotate the view.

Everything in this document is original demo content.

The viewer runs on the safe Rust pdfoxium API.

READING

Find your place

Search from the current page without losing context.

Search starts on the current page.
Typing highlights matches without moving the document.
Choose the next match when you are ready to jump.

A selection follows each line, including font changes.
Drag across text to select it, then copy with Command-C.

Search for "document" to see several matches.
A document can contain text, paths, images and forms.
The original document stays intact when you save a copy.
